Class:

Name:

[1-3] Read the passage, and answer the following questions.

Birds are a group of animals. Sparrows, hens, and gulls are birds. They are different from other animals. Bears and rabbits have fur on their skin. But birds have feathers. Birds have wings, too. Feathers and wings help birds fly! Birds lay eggs. They sit on the eggs and keep them warm. Then baby birds hatch from the eggs. Parent birds feed their babies with insects or small animals.

1. How are hens and bears different?

- ① Bears have feathers but hens don't.
- ② Bears eat insects but hens don't.
- ③ Bears and hens are both birds.
- ④ Hens have wings but bears don't.

2. Which has wings?

- ① rabbit
- ② gull
- ③ frog
- ④ kangaroo

3. What do baby birds eat?

- ① flowers
- ② rice
- ③ small animals
- ④ corn

[4-6] Read the passage, and answer the following questions.

Birds spend much time looking for food. Most birds eat insects. Insects are very good food for swallows! But some birds like parrots eat seeds or fruit. Other birds eat meat. Owls eat small animals! Most birds can fly. They fly here and there for food. But some birds like kiwis and ostriches cannot fly. They walk or run on land. They find their food there. Some birds like penguins and ducks find their food in water. They are good swimmers!

4. What is the main topic of the passage?

- ① How are birds alike?
- ② Life of birds
- ③ Birds and nature
- ④ What do birds eat?

5. Which is not a bird?

- ① penguin ② parrot ③ kiwi ④ kangaroo

6. Which is **NOT** true about birds?
